Choice

in Refrigerator

When you are looking for a refrigerator, make it Sharp.

With the widest range of refrigerators available, Sharp has one to suit every need.

Each is equipped with revolutionary technology to keep food fresh and free from contamination, and to reduce energy consumption and help you save on electricity bills.

That's why Sharp is your Number 1 choice in refrigerators.

Plasmacluster Ion Technology

- Keeps Food Free From Contamination
- Eliminates 99% Airborne Bacteria and 97% Airborne Mold

AGCU Nano Deodoriser

- Help Reduce Odours

J-Tech Inverter

- Saves Energy, Saves Cost
- Optimising Cooling Efficiency, Preserve Freshness

HYBRID COOLING SYSTEM

Hybrid Cooling Technology

- Even and Fast Cooling
- Maintain Healthy Moisture Level and Prevents Dryness

7 Shields Protection

- Complete Safety Protection For Your Refrigerator

Wide Range of Line Up

- Meets Individual Needs

Plasmacluster Ion Technology

Keeps Food Free From Contamination

As your refrigerator is frequently opened and closed, your foodstuffs are exposed to contaminants. Therefore, Plasmacluster Ion Technology eliminates contaminants like bacteria and mold by releasing positive and negative ions in the refrigerator to keep your food free from microbes and stay fresh longer.

How does Plasmacluster Mechanism Removes Microbes

The ions are long-lasting* because they are surrounded by water molecules.

1 Ions are released.

Plasmacluster ions are generated by plasma discharge and released into the air.

2 The ions act on airborne Bacteria and Mold.

The ions from hydroxide (OH) radicals are highly oxidising when they adhere to the surfaces of mold and bacteria. They instantly remove the hydrogen from the protein's surface breaking them down.

3 The broken-down components return to the air as water.

The hydroxide (OH) radicals combine with hydrogen (H) to form water (H₂O), which returns to the air.

*Verified in Sharp test comparisons of ions not surrounded by water molecules.

Test results from Sharp Corporation Japan. It shows Plasmacluster Ions inhibits the growth of mold on food, compared to food stored without Plasmacluster Ions.

Without Plasmacluster

Plasmacluster

Removal of Mold**

Reduction Of Airborne Mold

**Tested by Ishikawa Health Services Association

Removal of Bacteria***

Change Over Time In Bacterial Count Of Airborne MRSA

***Tested by Kitasato Institute Medical Centre Hospital, Research Division

AG CU Nano Deodoriser

Help Reduce Odours

AG CU Nano Deodoriser is placed at the refrigerator compartment to reduce both bacteria and odours. When air passes through the filter, the molecules that create smells are oxidised and broken down.

The Effectiveness Of Plasmacluster Ion Technology and AG CU****

Plasmacluster Ion Technology, eliminates harmful bacteria like E.Coli, Micrococcus Luteus, Micrococcus Roseus, Enterococcus Faecalis and Mold that cause food poisoning.

ELIMINATES HARMFUL BACTERIA

E. Coli

Enterococcus Faecalis

Micrococcus Luteus

Mold

Micrococcus Roseus

****Research conducted by University of Applied Sciences Aachen, Germany, Kitasato Research Center of Environmental Sciences, Japan and Ishikawa Health Service Association, Japan.

Gradual Steps Consume Least Amount Of Energy And Saves Cost

**J-TECH INVERTER
SHARP**

J-Tech with 36 Gradual Steps
The smaller cooling range from one point to another uses less energy and saves cost.

Conventional Inverter

Conventional with 7 Wide Steps

The wider cooling range uses more energy to go from one point to another, this increases cost.

Comparison Between J-Tech Inverter And Conventional Inverter

The set temperature for J-Tech Inverter refrigerator does not go very high or drop to very low. It keeps the temperature fluctuation to a minimal point. Whereas for the conventional inverter, the set temperature goes very high and very low consuming more energy compared to J-Tech Inverter which minimises electricity consumption.

Rotation Speed (rpm)

Optimising Cooling Efficiency Preserves Freshness While Saving Energy

HIGH & LOW ROTATION

HIGH ROTATION

Cools Food In A Quickest Time, Saves Energy And Preserves Freshness

J-Tech Inverter's high rotation speed of 4250rpm cools food in the shortest period of time while saving energy. Whereas, conventional inverter with 3250rpm takes a longer time to cool and consumes more energy.

LOW ROTATION

Goes On Low Rotation Speed When Refrigerator Is Less Frequently Used

J-Tech Inverter saves energy by maintaining low rotation speed of 1200rpm (without affecting your food freshness) when the refrigerator is least used. Conventional inverter goes on slightly higher rotation speed of 1300rpm compared to J-Tech. It uses more energy when the refrigerator is idle.

LOW NOISE & VIBRATION

Quiet Operation

This feature reduces operational noise by 50%* (2.9dB) and vibration by 30%* compared to conventional models.

*Based on Sharp's Internal Test

HYBRID COOLING SYSTEM

Maintains Healthy Moisture Level and Prevent Dryness

Hybrid Cooling Technology cools the air that travels from refrigerator's compressor through its Hybrid Cooling panel. The aluminium panel inside is cooled to approximately 0°C which cools the air faster and radiates the cool air evenly to every compartment of the refrigerator.

It also turns water molecules that get into the refrigerator to moisture, preventing food dryness.

Food Spoils Faster With Conventional Cooling Technology

Food Remains Fresh With Hybrid Cooling Technology

7 Shields Protection

Complete Safety Protection For Your Refrigerator

Stability

Sturdy base tested to 10 degrees tilt.

Insulation

High safety compliance design protects users from electric shock.

Lightning

Power board is protected from power surge with varistors.

Fire

Power board is enclosed by fire-retardant material.

Voltage

Stable operation in wide voltage range (99-264V).

Vibration

Ensures the quality of the refrigerator will not be affected by even the roughest handling during delivery.

Rat

Anti-rat protection on electrical wires.

Innovative Features

Flexi Room

Preset Temperature Settings

Flexi Room's Preset Temperature mode allows you to select any of its four settings that suit your food items. Each of these settings will return to your previously set default temperature settings after a period of time.

Cool Down Mode

Flexi Room, amazingly cools down your warm food items (< 60°C) without affecting the overall refrigerator's temperature. Suitable for food items that are good to serve cool, like desserts.

Defrost Mode

Flexi Room defrosts your frozen items for all your cooking convenience.

Extra Cool Mode

It also chills your carbonated can drinks at 0°C in a fastest period of time. The bubbles in the drink will be smaller and finer which makes it easier to drink.

Express Cool Mode

Flexi Room, also chills your daily food items quickly to its right temperature preserving its freshness.

Manual Temperature Settings

You may also manually set the Flexi Room's temperature to a permanent temperature setting. Choose and set either Deep Freezing, Soft Freezing, Chill or Cool as your permanent temperature setting.

4 Different Temperature Settings

DEEP FREEZING -18°C

Suitable to preserve food freshness longer.

SOFT FREEZING -8°C

Chills and maintains soft food texture from deep freezing.

CHILL 0°C

Ideal for preserving daily food freshness.

COOL 3°C

Perfect to chill food that is to be served shortly.

Touch Control Panel

Control Settings At A Touch Of Your Finger

The sophisticated touch control panel, allows you to adjust the temperature settings and switch modes according to your preference. You are able to select the size of your ice cubes from either big or small. It also allows you to select the ice tray self-cleaning mode from outside, all without opening the refrigerator's door.

Designed to minimise door opening, prevents temperature fluctuation and preserves your food freshness.

"Karakuri" Water Dispenser

A Hidden Luxury In Your Refrigerator

The word "Karakuri" means hidden in Japanese.

"Karakuri" water dispenser is a concealed compartment located on the refrigerator's door, keeping it free from dust and insects which holds up to 4 litres of water.

Innovative Features

9-Way Flexible Shelf

9-Way shelf gives you the complete flexibility to store almost any size of food items without a fuss.

Pillarless Design

There's Always A Place For Your Big Items

This unique Hikaru Refrigerator lets you store bigger or wider items easily in its huge, non-compartmentalised center pillarless fridge section.

Vegetable Case

Bigger And Organised Compartment

Covered vegetable drawer case, locks in the freshness of your high-moisture food items like vegetables and fruits. Its spacious compartment also helps in keeping your food items conveniently.

Auto Ice Cube Maker

Hassle Free Ice Cube

This technology offers hassle-free ice making process where you just need to fill up water in the water tank, choose the size of your ice cubes from either big or small and the refrigerator makes the ice cubes for you automatically!

Diversified Freezer Compartments

A Right Storage For All Your Frozen Needs

Store your frozen food conveniently with Sharp Hikaru's small and big freezer compartments. These two different sized freezer compartments, allow you to select and store your frozen items according to their sizes.

Auto Ice Maker

Hassle Free Ice Making Process

Fill water in the water tank and the refrigerator makes the ice cubes for you automatically!

LED-Status of Ice Making

You can choose the type of ice cubes you want from the touch panel without opening the door. Monitor the ice making process by observing it at the touch panel.

Self-Cleaning System with AG+ Ion

The water tank, pump and tray are coated with AG+ Antibacterial Ions, doesn't require any maintenance. Cleaning also made easy with a touch of the Ice Maker Cleaning Mode which only takes 40 seconds.

Four Types of Ice Cubes

Forming crystal clear ice cubes that are all ice, with less air bubbles trapped inside them that make them look cloudy. Avance Crystal Clear Ice Cube Maker removes all the trapped air to produce solid ice cubes that are slower to melt. Your drink remains ice-cold longer.

Crystal Clear Ice Cube	Normal Ice Cube
Large (2.3x bigger)	Regular

Features indicated on this page are for model SJF104VGBK only

External Door Control Panel

Control Your Settings Without Opening Its Door

BOTTOM FREEZER

Less Bending And Easy Access To Fridge Compartment

You can conveniently put in and remove items from the fridge compartment without having to bend down every time.

4 DOOR CONVENIENCE

Easy Access To The Preferred Compartment, Retains Food Freshness

By opening just one door, the escape of chilled air is minimised, thus retaining the freshness of the food and also saving on energy. Besides that, four doors are also light weight and easier to open compared to two doors which are much heavier.

Express Freezing

Makes Ice Cubes Within Minutes

Express freezing makes ice cubes for you within 93 minutes which is 40% faster compared to conventional models.

LED LIGHTING

Clear Visibility With Brighter Interior

Beautifully illuminated spacious interior, defines the elegance of the refrigerator and a clear visibility when reaching for your food.

Extra Cool

Savour Your Every Sip

Enjoy sipping your favourite carbonated cool drink at 0°C - 2°C.

When your carbonated drink is kept in a lower temperature, the bubbles in the drink will be smaller and finer which makes it easier to drink, compared to 3°C - 5°C in conventional models.

PILLARLESS DESIGN

Easy Storage For Your Wide Items Up To 78cm

You can store big items easily in its huge, non-compartmentalised pillarless fridge section.

Pillarless design stores large items

Eco Mode

Saves Energy By Extra 10%*

Energy saving feature that reduces electricity consumption by 10%.

Spacious Freezer
For All Your Frozen Needs

Wide
Voltage Range
(160V-260V)

Dual Switch
Setting

Express
Freezing

LED
Lighting

Innovative Features

Wide Voltage Range (160V-260V)

A wide voltage range the first of its kind provides uninterrupted operation should there be fluctuation of power supply.

Dual Switch Setting

The dual switch setting gives you the flexibility of converting your chest freezer to either a fridge or a freezer.

Express Freezing

Express Freezing function within the dual switch setting allows you to freeze your food faster.

LED Lighting

The chest freezer is illuminated with luminous LED lighting which enables clear visibility when you look for your items in the freezer.

Removable Basket Storage

Conveniently store your daily used items in the basket for easy access. You can also remove the basket whenever you want to store big items in the freezer.

Built-in Safety Lock

Built-in safety lock allows you to lock your freezer preventing unnecessary openings, especially by children.

White Coated Inner Steel Panel

Inner steel panel gives durability and toughness while the white coated inner panel provides easy cleaning and faster cooling.

CHEST FREEZER

Selections According To Your Preference

SJC518 (White)

510 Litres

- Wide Voltage Range (160V-260V)
- Dual Switch Setting
- Express Freezing
- LED Lighting
- Removable Basket Storage
- Built-in Safety Lock
- Grip Handle
- Dimension (mm):
510L: W1535 x D740 x H825

SJC318 (White)

310 Litres

SJC218 (White)

220 Litres

SJC228 (Grey)

- Wide Voltage Range (160V-260V)
- Dual Switch Setting
- Express Freezing
- LED Lighting
- Removable Basket Storage
- Built-in Safety Lock
- Grip Handle
- Dimension (mm):
310L: W1116 x D604 x H835
220L: W950 x D564 x H835

SJC178 (Grey)

160 Litres

SJC168 (White)

110 Litres

SJC128 (Grey)

SJC118 (White)

- Wide Voltage Range (160V-260V)
- Dual Switch Setting
- Express Freezing
- LED Lighting
- Removable Basket Storage
- Built-in Safety Lock
- Grip Handle
- Dimension (mm):
160L: W754 x D564 x H845
110L: W574 x D564 x H845
